

H2 MULTI

lubricates, adheres, protects

Item no. 722 500 Bombe 500 g

Item no. 722 500

PRODUCT DESCRIPTION:

The bearing grease H2-Multi is especially suitable for wheel, plain and roller bearings. The product features high rolling stability due to the minimal change in consistency, even under shear, flexing or impact loads. The special adhesive additive ensures that the bearing grease is distributed evenly in bearings and hubs. This premium grease is impressive with its high rust protection effect, good ageing stability and water resistance.

ADVANTAGES:

- Water-resistant
- Excellent lubricating performance due to special adhesive additive
- Good ageing stability
- Temperature range from -25°C to +150 °C (short-term +180 °C)
- Neutral to rubber and plastics

APPLICATION AREA:

Universally applicable for wheel, plain and roller bearings for vehicles, machines and bikes.

PROPERTIES:

NLGI class: 2

Density at 20°C : 0,99 g/m³
